THE STATE OF NEW HAMPSHIRE

TOWN WARRANT

To the Inhabitants of the Town of Hinsdale qualified to vote on Town affairs :

You are hereby notified to meet at Town Hall, on Tuesday, the 8th day of March, 1955, at nine o'clock in the forenoon, and act on the following subjects :

Article 1. To elect all necessary town officers.

Article 1A. To see if the provisions of Chapter 171-A of the Revised Laws relative to playing games of beano shall be adopted in this town.

(Polls are open on Articles 1, 1A from 9:00 A.M. to 6:00 P.M.)

Article 2. To see if the Town will vote to accept and adopt the report of the Selectmen, auditors and other town officers.

Article 3. To see how much money the town will vote to raise and appropriate for the payment of ordinary town charges, for the maintenance of the fire department, for highways, and for all other necessary expenses arising within the town. (*See Budget)

Article 4. To see if the voters will authorize the Selectmen and Town Treasurer to borrow a sum or sums not exceeding in the aggregate \$50,000.00 in anticipation of the collection of taxes for the current municipal year, and to issue in the name and on the credit of the Town negotiable notes therefor, said notes to be repaid during the current municipal year from taxes collected within the current municipal year.

Article 5. To see if the Town will vote to raise and appropriate the sum of \$393.10 to which the State will contribute \$2,620.65 to be expended on Class 5 roads.

Article 6. To see if the Town will vote to raise and appropriate a sum of money for the maintenance of a street light on Cottage Street or act in any manner thereon.

Article 7. To see if the Town will vote to raise and appropriate a sum not to exceed twelve hundred dollars (\$1,200.00) to extend the water and sewer a distance of two hundred eighty (280) feet

northerly from the Brattleboro Road on the Sanderson property development, on the proposed street leading to the two new houses built thereon, or act in any manner thereon.

Article 8. To see if the Town will vote to raise and appropriate the sum of \$1,000 to put drainage, gravel and tar on Fitzgerald Court, or act in any manner thereon.

Article 9. To see if the Town will vote to raise and appropriate the sum of twenty-five hundred dollars (\$2,500.00) for the construction of a tomb in Pine Grove Cemetery, or act in any manner thereon.

Article 10. To see if the Town will vote to raise and appropriate a sum of money to extend the blacktop on the Oxbow Road by Ralph Tobey's place for one-half mile.

Article 11. To see if the Town will raise and appropriate the sum of eleven-hundred dollars (\$1,100.00) to pay for graveling and tarring the road behind Streeter's Machine Shop.

Article 12. To see if the Town will vote to authorize the Selectmen to borrow on the credit of the Town a sum of money not to exceed two-hundred seventy-five thousand (\$275,000) dollars to construct a water system in North Hinsdale of sufficient capacity to provide water for fire protection and domestic use in North Hinsdale and so connected as to serve as an auxiliary supply to the present village water system, or act in any manner thereon.

Article 13. Transact any other business that may legally come before this meeting.

Given under our hands and seal in said Hinsdale this 14th day of February, 1955.

JOHN W. ROYCE
J. DAVID DUGGAN
CLIFFORD D. STEARNS
Selectmen of Hinsdale

A true copy of Warrant—Attest:

JOHN W. ROYCE
J. DAVID DUGGAN
CLIFFORD D. STEARNS
Selectmen of Hinsdale

WATER DEPARTMENT

SPECIAL WATER COMMITTEE

November 22nd, 1954.

Special Water Committee
Town of Hinsdale
Hinsdale, New Hampshire.

Subject: Exploratory Test Wells

Gentlemen:—

In accordance with our agreement, this office has supervised the exploratory work performed by R. E. Chapman Company in connection with the proposed water supply for North Hinsdale.

Two test borings were made on the lands of Arthur Butler in the general vicinity of Lily Pond. The first test boring (1) was located approximately 200 feet west of the path leading from the gravel pit to the base of the slope bordering Lily Pond. Work on this hole was started on October 20th and finished the 21st. The log of the well is as follows:

- 0—12 ft. Brown and grey sand and gravel.
- 12—35 ft. Brown sand and gravel, and fine brown sand.
- 35—55 ft. Brown and grey sand and gravel, and fine sand.

Water was first encountered 4 feet 3 inches below grade, and was of a dark reddish color, indicating the presence of iron. The reddish color disappeared after the casing had been driven a few feet below ground water level.

On October 21st an observation hole 2 feet from Hole No. 1 (Test Boring 1-A) was installed, to a point 54 feet below grade. On the 21st this well was pumped for approximately 6½ hours at a rate of about 73 gallons per minute, and a drawdown of 2 feet was noted in the observation well. The water cleared within a few minutes after the pump was started.

A sample of the water was taken by the New Hampshire State Department of Health, and the analysis is enclosed. It will be noted from the analysis that the iron content was 1.1 ppm, which is far in excess of the maximum allowable of approximately 0.3 ppm. This water would not be suitable for use without treatment.

A second boring (No. 2) was made at the foot of the slope just north of the gravel bank, and in this location the ground surface was approximately 2.5 feet higher than at Well No. 1. This boring was constructed to a depth of 51 feet, and the ground water level was 3 feet 8 inches below the surface. The first 15 feet below the ground surface in this location consisted of heavy gravel, boulders and fine brown sand. The material encountered from 15—36 feet was substantially the same. From 36 feet to 51 feet, grey and brown sand and gravel was encountered. This boring was started October 22nd and completed on October 26th.

On October 27th an observation hole (Boring 2-A) was put down 2 feet from Well No. 2 to a depth of 51 feet. Test Well No. 2 was pumped on the 28th of October from 9:00 A.M. to 5:00 P.M. at a rate of 85 to 90 gallons per minute. When pumping stopped, the well recovered to normal static level in about two minutes. When the well was being pumped at a rate of 90 gallons per minute, the draw-down was only 4" below static level.

A sample of this water was taken and analyzed by the New Hampshire State Department of Health, and the results of the analysis are attached hereto. It will be noted that the amount of iron in the sample analyzed was 0.1 ppm.

An examination of the analyses indicates that the water from both holes is soft water, with a hardness of less than 40 ppm, is slightly acid, having a pH of 6.6 to 6.8.

We are, however, at a loss to explain the difference in the amount of iron between Well No. 1 and Well No. 2.

Two additional borings were made at a location approximately midway between Hinsdale and North Hinsdale, along Plains Road. Boulders were encountered at depths of 15 to 18 feet, and these sites were abandoned. No water was found in this location.

The 2½" casing in Well No. 2 was capped, and this well is available for future exploration and observation.

The result of the exploration work indicates the possibility of obtaining water in a sufficient quantity to supply North Hinsdale in the Lily Pond area. If water of the quality obtained in Well No. 2 could be assured, the proposed water supply project for North Hinsdale would appear to be feasible.

As stated above, however, we are quite concerned with the amount

of iron found in the water from Well No. 1, as compared with the relatively small amount of iron found in Well No. 2.

We believe that additional exploration and pumping work would be necessary to determine whether wells in this area could produce water with an acceptable amount of iron, namely—less than 0.3 ppm.

Additional pumping tests might be made on Test Well No. 2 over an extended period of time, to determine whether the amount of iron in the water would increase or decrease. If further tests indicate that there is a tendency for the amount of iron to decrease, we would recommend that an 8" test hole be constructed in the same general location, and an extensive pumping test made at a high rate, to determine that a relatively iron-free water could be obtained. Such a well could be incorporated into the permanent supply for North Hinsdale.

If, however, the pumping of Test Hole No. 2 indicated an increase in the iron content, we believe it would be safe to assume that continued exploration in the same general area would produce a water requiring treatment before use.

In any event, the information obtained from this preliminary exploratory work indicates that there is a sufficient quantity of water in this area to warrant a more conclusive investigation, and it also appears from the preliminary information obtained that sufficient water might be obtained in the area to supply not only North Hinsdale, but also Hinsdale, should it be found desirable to do so.

We should be very glad to discuss this matter with the Committee after it has had an opportunity to consider same.

Very truly yours,

BARKER & WHEELER

August 3, 1954.

Special Water Committee
Town of Hinsdale
Hinsdale, N.H.

In accordance with our agreement, we have made a preliminary study of the problem of a water supply for North Hinsdale.

Our previous letters of November 23, 1953 and May 7, 1954, included certain information regarding the problem. It seems desirable, however, to repeat in this report some of the basic information and data included in those letters.

Appended hereto is a plan, which is an enlargement of the U.S.-G.S. sheet at a scale of 1"=2,000 ft., on which we have indicated Hinsdale, North Hinsdale, portions of the existing Hinsdale water system, the existing source of supply, the filter plant, and the proposed mains to serve North Hinsdale.

North Hinsdale may be described as that area north of Hinsdale, with the area desired to be served in the immediate future confined to a portion of the Brattleboro Road, both north and south of Monument Road; Monument Road from the Brattleboro Road to Oxbow Road; Oxbow Road from Monument Road to the Oak Grove Church; Oak Grove Road from Oxbow Road to Plains Road; and Plains Road from Monument Road northerly to a point approximately 4,500-ft. north of the Oak Grove Road, requiring approximately 32,000-ft. of pipe.

At present time, this area has approximately 100 homes.

Existing Hinsdale Supply

The present water supply serving Hinsdale is a gravity source, constructed in 1935 by damming Kilburn Brook and forming Kilburn Reservoir with a normal water surface at elevation 1,040. This reservoir is located approximately three miles north of Hinsdale, has a drainage area of 1.63 square miles, and an estimated safe yield of 500,000 gallons per day (Metcalf & Eddy). Water from Kilburn Reservoir is allowed to run down Kilburn Brook as required, to a distribution reservoir at elevation 568, constructed about 1½ miles north of Hinsdale on the Chesterfield Road.

A filtration plant is located immediately downstream from the lower reservoir. This plant consists of a 7-ft. diameter, steel, chemical mixing tank; two 14 ft. x 24 ft. x 8 ft. 6 in. deep covered concrete coagulation basins, and two 7-ft. diameter steel tub, rapid sand filters.

With the exception of the coagulation basins, all of the plant is housed in a brick masonry structure.

The filter plant has a nominal capacity of 200,000 gallons per day.

After filtration, the water is piped to Hinsdale through an 8-inch cast iron line along the Chesterfield Road. There is no filtered water storage at the filter plant, and the filtered water is either used immediately, or stored in a 250,000-gallon steel distribution reservoir in Hinsdale, 35-ft. in diameter and 30-ft. high, having a high water level at elevation 455.

The existing 8-inch transmission line from the filter plant to Hinsdale has a maximum capacity of approximately 690-gallons per minute when the filter plant is bypassed and water taken directly from the adjacent reservoir. This line has an estimated maximum capacity of approximately 400-gallons per minute, based on a coefficient of $C=100$, and allowing a 6-ft. loss of head through the filters.

Population

The population of the Town of Hinsdale has been reported by the Bureau of the Census as follows:

1910	1,673
1920	1,773
1930	1,757
1940	1,762
1950	1,950

The 1950 Census of the unincorporated community was 1,247. It is estimated at the present time that the current population is somewhat above this figure. Approximately 400 consumers in the community are connected to the water supply system.

Water Use—Hinsdale

The amount of water filtered and delivered to the distribution system is measured at the filter plant by means of a Sparling meter. Records of the daily water use for 1953 indicate that the average daily use was around 175,000-gallons per day, and the reported maximum daily use was 314,000-gallons.

The above figures, however, are believed to be incorrect, as trouble has been experienced with the meter. Since the repair of the meter, the period from May 7th through May 20th, indicated an average daily use of 93,000-gallons. This compares with the use during the month of May 1953 of 174,000-gallons per day. It would, therefore, appear that the available records for the year 1953 should be multiplied by about 55% to obtain the correct water use. If this is true, the maximum daily use in 1953 may have been about 173,000-gallons.

Sources of Water Supply

In connection with a water supply for North Hinsdale, we have investigated two main projects.

Project No. 1 is based upon a well supply to serve North Hinsdale, with wells constructed in the Lily Pond area.

Project No. 2 utilizes as the source of supply, the existing Hinsdale system, and embraces pumping water from the Hinsdale system to North Hinsdale.

Studies have been made with regard to obtaining a gravity supply from the existing Hinsdale system, and abandoned as not being practical.

Project No. 1

An investigation was made by Metcalf & Eddy in 1933 in connection with the possibility of a well supply in the North Hinsdale area to serve Hinsdale. Neither an adequate nor satisfactory supply was obtained.

However, investigations were not made in the Lily Pond area which appears to be the most favorable location for the construction of wells.

Based upon the assumption that water of a satisfactory quality and adequate quantity could be obtained in this area, we have estimated that a water supply could be developed for a cost of approximately \$200,000.

This system would consist of the installation of approximately 32,000-ft. of 8" pipe and appurtenances, as shown on the accompanying map in solid lines; construction of a 200,000-gallon distribution reservoir, and the development of a well, or series of wells, in the Lily Pond area.

The distribution reservoir in connection with this system would be located east of Plains Road in the approximate location shown upon the plan, and would have a water surface elevation of approximately 550.

This system would be capable of providing fire flows throughout the distribution system of not less than 500-gallons per minute, with a residual pressure of 20-pounds.

This project is based on the assumption that a well supply could be developed as outlined above.

If the above system were developed, and it became desirable to interconnect the Hinsdale and North Hinsdale systems, a line could be constructed on Plains Road from Monument Road to a point of connection with the Hinsdale system, requiring a total length of pipe line of approximately 13,200-ft. This line should be constructed of 8-inch pipe, and would permit a flow in excess of 500-gallons per minute from the North Hinsdale to the Hinsdale system. The two systems would be interconnected with an automatic pressure regulating valve, which would allow water to pass from the North Hinsdale system to the Hinsdale system, only at such times as pressures in the Hinsdale system dropped to a predetermined low point.

In other words, such an interconnection would provide an emer-

gency source of water supply in case of failure of the Hinsdale system, and would also be capable of providing both domestic and fire protection service to the Plains Road between the points of connection.

The estimated cost of such an interconnecting line would be approximately \$57,000.

The present water requirements to serve approximately 100 homes, of some 400 people, might vary from a normal daily requirement of 20,000-gallons to a maximum of 40,000-gallons, or considerably higher if extensive sprinkling of lawns occurs, and the people are inclined not to be conservative with the use of water.

A well system for North Hinsdale at the present time should have the ability to produce a minimum of 100-gallons per minute, preferably from not less than two wells, and the well field should be capable of supporting the additional development of wells to meet future expansion, growth, and water use.

The above system would be designed to be entirely automatic in operation. However, it should receive daily inspection.

To serve the present population, and based on pumping 40,000-gallons per day, we have estimated the pumping cost, based upon a cost of 3¢ per kw hour, should not exceed \$35 a month, or \$420 per year.

Project No. 2

This plan would consist of the construction of the same distribution lines and distribution storage tank as outlined above under Project No. 1, together with the installation of the interconnecting line between North Hinsdale and the Hinsdale system along Plains Road, and the construction of a booster pumping station on Plains Road near Stebbins Street, taking water from the Hinsdale system and pumping it into the North Hinsdale system.

Such a project, however, is not practical without increasing the capacity of the Hinsdale system. As stated above, the present filtering capacity is approximately 200,000-gallons per day.

In order to meet the maximum rate of use during the peak periods, it has been necessary to operate the filter plant twenty-four hours a day.

It is, therefore, obvious that while there might be sufficient water

available to supply North Hinsdale at the present time, continued growth either in Hinsdale or North Hinsdale, and the increase in water use, would make it mandatory to increase the capacity of the filter plant.

It would, therefore, be our recommendation that if the Hinsdale system is used as a source of water for North Hinsdale, the present filtering facilities be increased to a point to make it possible.

We would recommend that if it is decided to enlarge the filtering plant, the structural changes in the building be extensive enough to allow for doubling the filtering capacity in the future, and to increase the present capacity by 50% at this time. This would be accomplished by the addition of a new chemical mixing tank and one new steel filter. A new coagulation basin, together with piping, valves and controls would also be required.

We have estimated that to increase the coagulation capacity by 50%, the mixing capacity by 100%, and the filtering capacity by 50%, together with the enlargement of the filter building so that an additional filter could be added in the future, would cost approximately \$30,000.

The capacity of the present 8-inch transmission line, based on the information available, and an assumed coefficient of $C=100$, has sufficient capacity for the proposed enlargement. The condition of the interior of the pipe lines is not known; however, if the lines contain considerable deposit, as was found in the Sparling meter, it is possible that the coefficient would be less than 100, resulting in a capacity of less than 400-gallons per minute, as mentioned earlier in this report.

This condition could be corrected by cleaning the pipe line, or by the installation of 1,000±ft. of new pipe line over the high point located approximately 1,000-ft. below the filter plant on the Chesterfield road.

The total estimated cost of Project No. 2, therefore, exclusive of any work on the existing transmission line, would be as follows:

Project No. 1	\$200,000
Deduct Well Supply	25,000
	<hr/>
	\$175,000

Add for Interconnecting Line between the two systems	57,000
Add Construction of Booster Pumping Station	15,000
Increase Capacity of Filter Plant	30,000
	<hr/>
TOTAL	\$277,000

We have estimated that the cost of pumping from the Hinsdale system to the North Hinsdale system would be slightly less than pumping from the well supply under Project No. 1, or approximately \$25 per month, or \$300 annually. In addition to this cost, there would be added the cost of filtration of water pumped to North Hinsdale.

The booster pumping station would be entirely automatic in operation, but it should be visited daily. It would seem that no additional personnel would be required for the operation of the filter plant; however, there would be the added cost of chemicals for the additional water treated.

All of the above estimates of cost are based upon present-day prices, and performing the work by competitive contract. The estimates include allowances for contingencies and engineering, but do not include allowances for legal fees, land and rights of way, printing, advertising, sale of bonds, or other incidental expenses.

Conclusions and Recommendations:

1. A distribution system, as herein described, and as indicated by the solid lines on the accompanying plan, consisting of the construction of approximately 32,000-ft. of pipe lines and appurtenances, a 200,000 gallon reservoir and a well supply, could be constructed for approximately \$200,000. (*This plan would be subject to the availability of a well supply of sufficient quantity and satisfactory quality.*)

2. An interconnecting line between the system described in (1) above, and the Hinsdale system could be constructed at an approximate cost of \$57,000. This interconnecting line would give Hinsdale an auxiliary water supply with minimum operating expenses.

3. North Hinsdale could be supplied from the Hinsdale system

by the construction of the pipe lines described under (1) and (2) above, together with the enlargement of the existing purification plant, and the construction of a booster pumping station, at a total cost of approximately \$277,000.

This compares with a total cost of equivalent facilities and available water for both North Hinsdale and Hinsdale of \$257,000, if the well supply for North Hinsdale and the interconnection with Hinsdale prove feasible.

It would, therefore, appear that if it is possible to develop a satisfactory well supply in the Lily Pond area, such a program would be in the best interests of both North Hinsdale and Hinsdale.

However, if a well supply cannot be developed, there appears to be no alternative except to serve North Hinsdale from the Hinsdale system, and the enlargement of the existing filter plant to accommodate the additional load.

We would, therefore, recommend that arrangements be made for the immediate drilling of a test well,—or wells—in the Lily Pond area, to determine the availability and quality of water that might be obtained in this area.

Respectfully submitted,

ROBERT C. WHEELER

HINSDALE WATER AND SEWER DEPARTMENT REPORT OF SUPERINTENDENT

During the year 1954, in addition to the regular activities of the Water and Sewer Departments, we are putting in a direct road to Kilburn Pond. The road begins opposite the Russell Garfield place on Chesterfield Road, and goes directly to the reservoir. This enables us to reach the pond in about one-half the time and is less than half the distance we had to travel before.

Also, this past year, much time and effort has been expended in combating the beaver problem. During the warm months, we have had to go to Kilburn about three times a week to destroy the beaver dams, so the water would keep its flow. We have the promise of the state Fish and Game Department to help us in the beaver control in the spring.

To keep abreast of the latest developments in municipal water systems, I have attended meetings in Peterboro, Lebanon, and Boston. These all have been very instructive as well as enjoyable conferences. The knowledge I have gained will be put to good advantage if we extend our water system to include North Hinsdale, as we do not anticipate having extra personnel to maintain the added service.

This year we have insured the departments for public liability, and have covered the employees for workmens compensation insurance.

Respectfully submitted,

CHARLES W. HARRIS

I wish to again take this opportunity to thank the Local, County and State authorities and agencies for their cooperation during this past year, as well as the citizens of the Town of Hinsdale.

Respectfully submitted,

HAROLD R. WEEKS

Justice

PUBLIC HEALTH NURSE

The following is my report for the period between January 1, 1954 and December 31, 1954.

No. of cases were :

Non-communicable	543
Communicable	83

Of these were :

Infant	28
Preschool	39
School	450
Adult	71
Crippled children	24
Tuberculosis, to clinics	16
Health services	31
Prenatal	7
Newborn	7
Postnatal	5
Field visits	1,363
Office visits	116
Cases Admitted	334
Cases Discharged	336

In April the first of four toxoid clinics was held in the community room. The attending physicians at these clinics were, Dr. Edmond LaChaine and Dr. John J. Doyle. The following received toxoid shots, infants 7, preschool 23, school 54. 17 children also received vaccinations.

My report of school activity follows :

There were 179 school days when children received attention. The number of times that children were seen, 4,213, at school and at home 166.

The following cases were :

Pediculosis	13
Impetigo	2
Chicken Pox	36
Infectious Hepatitis	1
Mumps	23
Ringworm of scalp	2
Measles	1

Pink Eye	1
To tuberculosis clinics	8
To orthopedic clinics	5
First Aid	28
Treatment for hearing	1

Each year there seems to be an increasing number of children afflicted with Poison Ivy, meaning the loss of several days of school, by many children, along with the discomfort that they have to endure. It is hoped that perhaps at some time in the near future something can be done to relieve this situation.

Regular inspections were made for pediculosis, and ringworm of the scalp. 7 children and school personnel attended 2 tuberculosis clinics, 5 children attended 3 Crippled Childrens Clinics in Keene. 3 Mental Hygiene Clinics were attended with 2 children.

2 conferences, of school nurses, for this region, and the regular annual meeting of school nurses in October were attended.

In June a talk on communicable diseases, was given the fourth grade.

The annual physical examination of school children was done after the beginning of school this fall, by Dr. Edmond LaChaine.

The following defects were found.

Enlarged or diseased tonsils	20
Poor teeth	71
Overweight	5
Underweight	22
Heart murmur	1
Asthma	1

Hearing tests were given 258 pupils, with 6 having some hearing loss.

Vision tests were given 487 pupils, with 58 having defective vision.

In September, the equipment used in the various tests, was shown to the P.T.A. with the explanation of their use, also other things done for them, such as clinics etc. and the explanation of charts and other forms used in carrying out this work.

I wish to thank everyone, for their help and cooperation given during the year.

Respectfully submitted,

GRAIS E. CHURCHILL, R.N.

LIBRARY REPORT

Hours open per week	20
Total circulation	23,152
Adult fiction	10,946
Adult non-fiction	1,854
Juvenile fiction	4,958
Juvenile non-fiction	3,670
Magazines	1,724
Average daily	84
Percent of fiction	68

The library was completely cleaned and redecorated this summer, being closed to the public for five weeks. Many have expressed approval of the work done.

We are losing many adult readers to television and a few children, but there are many more children to use the library every year. Books purchased for the library must meet this changing demand and we are very grateful for the Amidon Trust Fund which helps with the purchase of many childrens' books.

The bookmobile helps by supplying about fifty non-fiction books every two months. These books are expensive and we can use our funds to purchase the reference books required by the school children. The bookmobile also leaves hundreds of books at each visit to the Elementary School. We have not added these books to our circulation. This allows the children from North Hinsdale the use of the books without coming to the library although they have extra privileges in the library.

We have trouble with people who stay in town only a short time and take the books away with them. We check with other librarians in nearby towns and try to find out about these transients.

There are many books lost every year. Have you one belonging to the Hinsdale Public Library?

Respectfully submitted,

LUELLA M. C. STREETER

CERTIFICATE OF AUDIT

This is to certify that we have examined and audited the accounts and records of the Hinsdale School District for the fiscal year ended June 30, 1954, and found them to be in good order. Also included in our examination and audit were the records of the School Lunch Program and the Miscellaneous Funds of the Students' Activity Association for the same period.

In our opinion the Exhibits presented herewith reflect the true financial condition of the School District as of June 30, 1954, and the results of operations for the fiscal year ended on that date.

Respectfully submitted,

HAROLD G. FOWLER
Director, Division of
Municipal Accounting
State Tax Commission

C. David Sullivan, Auditor
Robert W. Flanders, Accountant

THE STATE OF NEW HAMPSHIRE

SCHOOL WARRANT

To the inhabitants of the School District in the town of Hinsdale qualified to vote in district affairs :

You are hereby notified to meet at the Town Hall in said district on the fifth day of March, 1955, at two o'clock in the afternoon to act upon the following subjects :

1. To choose a Moderator for the ensuing year.
2. To choose a Clerk for the ensuing year.
3. To choose a member of the School Board for the ensuing three years.
4. To choose a Treasurer for the ensuing year.
5. To hear the reports of Agents, Auditors, Committees, or Officers chosen, and pass any vote relating thereto.
6. To choose Agents, Auditors, Committees in relation to any subject embraced in this warrant.
7. To see what sum of money the district will raise and appropriate for the support of schools, for the salaries of school district officials and agents, and for the payment of statutory obligations of the district, and to authorize the application against said appropriation of such sums as are estimated to be received from the state equalization fund together with other income; the school board to certify to the selectmen the balance between the estimated revenue and the appropriation, which balance is to be raised by taxes by the town.
8. To see if the district will vote to raise and appropriate funds to the limit allowed by state law to be held in reserve for the construction of a new school building.

9. To see if the district will choose a school planning committee of five members, this committee to work with the school board in investigating possible future plans for the Hinsdale schools and to report its findings at the next annual meeting.
10. To see if the district will vote to make it mandatory for candidates for school district office to declare their candidacy at least seven days before the annual meeting.

Given under our hands at said Hinsdale, this fourteenth day of February, 1955.

REPORT ON THE ELEMENTARY SCHOOL LUNCH PROGRAM

The school year 1953-1954 is the fifth year in which the Hinsdale School Lunch Program has operated. A continuation of the type "A" lunches has been followed. A larger percentage of all pupils are participating in the program.

The menus are on file in the cafeteria and may be seen by anyone.

Again, the main miscellaneous contribution of cash has come from the Winchester, N.H., Kiwanis Club. This is a contribution of five dollars a month and is used to assist in maintaining the free lunches provided. We are indebted to the Kiwanis Club for their splendid support.

The following is a summary of the financial report; June 30, 1953 to June 30, 1954.

Cash on hand June 30, 1953	\$ 426.97
----------------------------	-----------

Receipts

Cash received from lunches	\$9,086.33	
Federal reimbursement from H.S.D.A.	1,511.38	
Miscellaneous cash contributions	65.00	
Total		\$10,662.71
Total cash on hand and receipts		\$11,089.68

Disbursements

Paid for food and milk	\$7,600.34	
Paid for labor	2,318.00	
Paid for equipment	49.28	
Other expenses	688.95	
Total		\$10,656.57
Cash on hand June 30, 1954		433.11

Respectfully submitted,

ROBERT A. GIRARDIN

Principal

REPORT OF THE PRINCIPAL OF THE HIGH SCHOOL

To the Superintendent of Schools :

I herewith submit my second annual report as principal of the high school.

It is gratifying to report that a majority of our staff returned for this school year. Only two positions had to be filled because of resignations. Our new teachers, including the additional one made necessary because of our increased enrollment, have adjusted well to our educational program. I feel it my duty to bring to the attention of our community through this report, the expectation that we as a small school may expect regarding the retention of teachers. With a growing school population and a lack of proper physical facilities with which to more equitably distribute the teacher-pupil load, we will be hard put to retain beginning teachers after they have gained two or more years of experience. The demand is rapidly exceeding the supply of teacher personnel. Too many communities have improved school buildings thus affording a better distribution of pupil-teacher responsibility and are becoming most attractive to the teacher with one or two years of experience. I believe our salary schedule is keeping and will keep pace with other communities of like size, but as reported last year, our physical plant is a factor teachers as well as program will be affected by if we allow ourselves to become negligent in this respect.

Our educational program continues to meet the requirements as established by our State Department of Education. We have been forced, because of lack of space, to curtail some educational areas. This curtailment will become vastly more acute within the next few years. The effect on departments may be noted in this report as it deals with them individually.

The use of guidance in a more improved selectivity of course selection as planned last year has had very satisfying results. Nearly all pupils are now pursuing courses of study best suited to their individual needs. The results of improved and selected testing very definitely has aided our guiding of pupils into areas of study from which they will derive far more benefits and at the same time eases

the teacher's task by providing greater percentages of pupils with like interests into our many classes. We very definitely plan to continue this function and develop improvements as they are needed.

As was planned last year, a once-a-week course of group guidance was introduced at the 9th grade level. This provides a much broader base for selectivity of courses than heretofore was available. We are using the Gentry Vocational tests for all juniors which are a decided aid to assisting in the choice of further education beyond high school. The Kuder Preference Record is being administered to pupils interested in attending vocational schools. All of these tests and additional guidance curricula have been added to the regular testing program thus giving Hinsdale as equally a diversified testing program as will be found in any New Hampshire secondary school.

We are, in addition to using the results of guidance as described, placing considerable stress on improved work results throughout our student body. The emphasis upon improved secondary school results is a national trend in education especially for those pupils with faster learning rates.

Increased assignments, broader field of study, improved study habits and improved written work is the theme throughout our entire program. Our educational standards cannot be permitted to deteriorate.

The increased expenditure this past year on books and supplies has made possible a far greater diversification of interest than before. The pupils benefit from such improvements and with a broader educational experience are better qualified to enter selected vocations.

Reporting on Departments :

The Commercial Department is growing rapidly. This area serves a most vital need in preparing our pupils for an important vocation. It has been necessary, because of lack of space, to limit study within this direction. Our testing program makes possible the serving of pupil needs within this area to a high degree of efficiency. Lack of room space prohibits the use of additional equipment for greater numbers of pupils even though it is available. Little can be done to broaden this area until enlarged table space is made possible.

The Commercial people have been hard at work in promoting the

growth and development of our school paper. This extra curricula activity is very closely associated with their regular work and lends a broadening as well as very practical application of the improved skills and attainment.

The Domestic Science area is decidedly improving. The acquisition of two new all electric sewing machines and a new electric range has added immeasurably to our equipment. This department, as in others, is undergoing a tremendous growth. All classes within this area are large thus limiting the extent to which any teacher can be expected to give individual attention.

A new linoleum was added to the home area and new drapes for the windows have improved the appearance of the room. Additional cooking dishes have also been well used and appreciated.

Our industrial arts area is rapidly reaching the limit of its ability to handle larger classes. Many boys are well fitted for study within their area but due to the lack of necessary space we cannot permit more to participate. I recognize the need for the teaching of related subjects within their area, but cannot provide for such at present. With an improved shop area shop mathematics, chemistry, English and other related subjects could be advanced thus giving us a needed technical school program.

Our language department has been very active this past year. In addition to the usual subject areas it has added the dramatics of the school. The Dramatic Club, a direct outgrowth of this area, very successfully produced 3 One Act Plays. The Senior Play was guided and produced by our language department, all of which serves the dual purpose of affording an improvement of program as well as aiding in assuring the necessary funds for the annual trips.

The Sports Program enjoyed a most successful year last year. Our teams were successful in gaining recognition to the extent of being awarded six trophies. This was the result of a successful year for both boys and girls in all six sports. We are pleased with victories as are all teams, but I urge that the overall purpose of our sports program be kept in mind. We seek to associate the outcomes of our sports program with all of our school work. Not every year can be a championship year. Some are, of necessity, devoted to building and this year we are proud to be doing exactly that. I personally believe our youth derive more from a not too successful

season in point of view of wins, than from one filled with continual victories.

Our intramural program is increasing. We hope to enlarge here through the adoption of the so-called carry over sports, namely tennis, golf, archery and related sports. These are essential in maintaining an educational program when one views the problem as that developed to educate the individual completely.

The music department carried on a most extensive program. From proceeds derived from concerts etc., it was possible to purchase a mellowphone and a sousaphone for our pupils' use. The band has had a very active year, participating in the All-State Festival, Brattleboro, Bellows Falls, Charlestown and this fall at Greenfield and the New Hampshire Educators' Centennial where they paraded before approximately 150,000 people.

The Christmas and Spring Concerts were well received as were the concerts offered singly and jointly with Thayer of Winchester.

Our dance band group had played at Keene Teachers College, Peterboro, N.H. and at all of our socials.

The chorus group now numbers better than 60 voices. This interest poses a serious problem. The domestic science room will not hold comfortably any more than are now taking part. Beginning this next year we will, because of lack of space, again have to become selective in permitting pupils to take part in this area of our music program. All pupils desiring to take part will be given selected tests to determine those best fitted for such participation and, within the ability of our facilities, will be accepted on the basis of test results. I hope, most sincerely, that this will soon be remedied.

Last year's senior class enjoyed a most interesting and entertaining trip to Washington. Such a trip is both educational as well as exciting for these young people. It was my pleasure and privilege to act as one of their chaperones and I am pleased to report that the conduct of each boy and girl was beyond reproach. All were a credit to their school and especially their homes.

The health department, capably administered by Dr. LaChaine and our ever obliging school nurse, has tested all pupils and their reports are used by all teachers. The more serious physical defects were reported to parents and corrective measure encouraged.

The financial status of the School Activities Fund as of January 1, 1955 is as follows :

Class of 1955	\$1,123.73
Class of 1956	518.41
Class of 1957	172.11
Class of 1958	104.15
Class of 1959	67.84
Class of 1960	
Music	546.18
Athletic	415.14
General	160.46

In closing my report, I cannot emphasize too strongly the co-operation I have been pleased to receive from all school personnel namely our bus drivers, school custodians, and especially the School Board and yourself. Without the unanimity of faith and support that has been in evidence these past two years the progress that has been developed would not have been possible. It is a most gratifying experience to be associated with the community of Hinsdale. With such faith in and support of its public schools there is every reason to look forward to the solving of our very acute high school building problem.

February 7, 1955

Respectfully submitted,

ROBERT A. GIRARDIN, Principal

REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the School Board and Citizens of Hinsdale :

I have the honor to submit my eighth annual report.

TEACHERS: As schools reopened in September, there were three new teachers at the high school and three new teachers at the elementary school. Mr. Vernon Dube, a graduate of Keene Teachers College, was elected to the Industrial Arts position. He replaced Mr. Joseph A. DiMeco who resigned to accept a similar position in Keene, New Hampshire. Upon the resignation of Mr. Edwin D. Barlow, Mr. Charles R. Bloomfield was elected teacher of Mathematics and Physical Sciences. Mr. Bloomfield holds the Bachelor's Degree from Dennison, University, Granville, Ohio, and the Master's Degree from Hofstra College, Hempstead, New York. Mr. Barlow is now teaching in Chappaqua, New York. Since it is now necessary to have two divisions in each of the seventh and eighth grades, Miss Persis E. MacLeod, a graduate of Keene Teachers College, was elected as teacher in the junior high school.

When Mr. Arthur G. Scott, Jr., resigned as principal of the elementary school to accept the principalship of the new junior high school in Southwick, Massachusetts, Mr. Robert A. Girardin was made supervising principal of both the elementary and high schools. There are two new first grade teachers at the elementary school, Mrs. Dorothy Chalfant, a graduate of Mills College of Education, and Mrs. Marion G. Mason, a graduate of Lesley Normal School. Both have had successful teaching experience. The former first grade teachers, Mrs. Gladys A. Lees and Mrs. Shirley I. Houle are now teaching in Brattleboro, Vermont and Gilsum, New Hampshire, respectively.

BUILDINGS: At the high school building, the commercial rooms and the chemistry laboratory were painted. The usual cleaning and maintenance was done at both buildings during the summer vacation.

ENROLLMENT TRENDS**Enrollment Table—September, 1954**

1956-57	30	42	40	46	62	49	35	304
1957-58	30	46	42	40	46	62	49	315
1958-59	27	35	46	42	40	46	62	298
1959-60	30	27	35	46	42	40	46	266

High School

School Year	7	8	9	10	11	12	Total
1955-56	42	47	42	33	30	29	223
1956-57	32	42	47	42	33	30	226
1957-58	35	32	42	47	42	33	231
1958-59	49	35	32	42	47	42	247
1959-60	62	49	35	32	42	47	267
1960-61	46	62	49	35	32	42	266
1961-62	40	46	62	49	35	32	264
1962-63	42	40	46	62	49	35	274
1963-64	46	42	40	46	62	49	285
1964-65	35	46	42	40	46	62	271
1965-66	27	35	46	42	40	46	236

As was pointed out in last year's report, the high school figures are high due to the mortality rate of drop-outs, etc. Nevertheless, they show unmistakably that the high school building will soon be overcrowded. It appears from the figures that we have but three years of grace before the enrollments will be too great for the present building to accommodate. A glance at the above table will suffice to show that the years 1958-59 and 1959-60 will be critical.

It is not too early to begin some long range planning for the Hinsdale school system. Sound, careful thought should be exercised, however, in formulating any given plan since hasty, ill-advised decisions can be calamitous.

MISCELLANEOUS: The instruction of handwriting in Supervisory Union #25 has been lacking in uniformity for some time. Expert supervision in this important tool subject has been deficient. Consequently, the four school districts of Hinsdale, Richmond, Swanzey, and Winchester, engaged the services of the Rinehart Handwriting System for the elementary grades. Improvement in the writing of the pupils is already noteworthy.

In conclusion, I wish to express my appreciation to the teachers, pupils and parents, the School Board, and the patrons of our schools for their cooperation.

Respectfully submitted,

CHESTER C. LEES

Superintendent of Schools

January 5, 1955
Winchester, N. H.
